1	<p>Why do we have the restrictions placed when they didn't apply for the waste transfer station when it closed due to asbestos?</p> <p>I booked hard waste collection and have had to wait a month for booking - not good enough timeframe. Would prefer a green garden bin as bulk garden collection no good for grass clippings - where do they go?</p> <p>Why are there no legal claims against the organization that wrote reports prior to the waste transfer station originally opening that failed to identify asbestos?</p> <p>Why when there are climate issues are we still supporting large burn offs that continue to polite the environment</p>	06 Oct 2024, 04:37 PM
2	<p>Why are you consulting the public now. Did you consult the public before. How much has this transfer station cost the rate payers. Do you think that you all should resign</p>	06 Oct 2024, 07:32 PM
3	<p>What is the estimated cost for the current curb side pickup of green and bulk waist for the next two years compared to the 8 million dollar fix of the tip??</p>	08 Oct 2024, 10:53 AM
4	<p>To Reopen the transfer site is \$8mil. What is the cost for the alternative?</p>	08 Oct 2024, 03:13 PM
5	<p>\$8mil cost to reopen transfer station? Is that \$8mil already taking into account the money saved on not having road side collections?</p>	08 Oct 2024, 03:32 PM
6	<p>Can you not cap/seal the current site and open a new better facility?</p> <p>To stop illegal dumping it would be better to put no limit on free dumping of certain materials.</p>	09 Oct 2024, 10:06 AM
7	<p>Hi Darrell, I would like to know how the agreement with the Kwinana refuse burning complex works? does the SJ Shire pay to take all waste there or do they pay as they are burning it for power production?</p>	09 Oct 2024, 03:21 PM
8	<p>Why can't you use the hard rubbish areas that all sealed with concrete? Can the reuse shop be reopened to give residents another option? Continue green waste on demand, that would be a lot cheaper than spending 8 million and waiting 2 years plus. Can we please have an answer please?</p>	09 Oct 2024, 03:37 PM
9	<p>Release a break down of the costs that got you to \$8,000,000....</p>	09 Oct 2024, 06:31 PM

- 10 Can residents have a breakdown of the \$8million costs to reopen the current waste station please 10 Oct 2024, 10:20 AM
- 11 Your survey only gives the questions YOU want. Not the options WE want. Therefore it is not an accurate view, but a method of promoting your views. WE want verge collection back please. 14 Oct 2024, 07:25 AM
- 12 Why can't we get free tip passes for Armadale waste centre? 14 Oct 2024, 02:23 PM
- 13 Why was I not able to submit my response in the app? 15 Oct 2024, 01:04 PM
- 14 Would the new upgrade facility come at a cost to rate payers. Would there be a tip shop, if so would monies go back into maintaining the running of this facility. Cost involved if any. 19 Oct 2024, 08:31 AM
- There were no options to make comments.
1. I already have a worm farm and chooks so have no food waste going into the bin, so why would I need subsidised access to a worm farm. People should purchase their own worm farms that are not expensive in the long term.
2. Instead of opening the inadequate transfer station, use the \$8 million to purchase a block and develop a purpose built green waste and recycling centre. This option was not offered.
- 15 3. How much does it cost for all the curb side Collects currently, and with expected increases over the years, how is this compatible with spending some money on building a suitable waste management facility for the long term. 27 Oct 2024, 07:58 PM
4. Can you please ensure there are comments built into future surveys so enable correct feedback so it is not screwed by the way questions are asked? Thanks so much for your attention to getting waste management correct.
- 16 Given many shires provide inorganic collection every year, why don't you? 29 Oct 2024, 05:38 PM
- 17 Open the waste depot it seems to be the majority vote. Stop reiterating \$8 million to set up, it worked ok last time. Make the shop card and cash next time. Is there any chance they can set up a system like Elenbrook tip? 29 Oct 2024, 07:35 PM
- 18 They have rubbish trucks and bins to put all your waste in most is recycled it would be similar to a verge side collection instead of them picking it up we take it to them. 30 Oct 2024, 01:07 PM
- 19 Green waste - September to March till the next green waste collection is a long time. We can't burn after a certain time yet my trees and bushes don't stop growing in this time. Other than filling my bins with green waste, if I pile it up it's a fire risk. We need to have somewhere to dump this. 31 Oct 2024, 07:45 AM

Do not proceed with \$8million investment into watkins road. That is a huge and unnecessary burden to be passed directly onto rate payers. Watkins rd tip became unsustainable due to population growth and incorrect disposal of goods - this should not be a reason that capital investment is passed onto rate payers.

20 06 Nov 2024, 08:09 PM

I've completed your survey, and nowhere does it give the option to voice the opinion of a total 'no' as a vote against reopening Watkins road.

Where can I get the information regarding the requirements to lodge a quote for the remediation of the rubbish tip, please?

21 18 Nov 2024, 01:58 PM

how do you organise a verge collection if you have no verge?

22 18 Nov 2024, 04:02 PM

Hello, as part of fire mitigation we are constantly raking up leaves and branches around our property. We use to do multiple trips to the landfill just for green waste. Only having 2 collections a year is not enough for those who have properties. Why are we not provided with multiple passes for our other land fill just for green waste? Are we able obtain passes for this?

23 28 Dec 2024, 12:48 PM

Kind regards
