The only thing you need to do is keep the cemeteries clean and tidy , nothing more nothing less , that's what shires do , what is required

ref SERPENTINE : as a 3rd Generation Farmer in this area , I would like to think that our, and following Generations would have the same opportunity to be buried (if they so wish) in the area of their 'living' years. I believe this local Final Resting Place is very important indeed, As much as I acknowledge the importance of the Bush Forever site on the southern border, I would be very much in favour of expanding to the south, to accommodate further plots. Seed should be collected from these important Flora, so by growing plants in a local nursery, mature Native Plants can be planted in the borders, & as required in the new section of the Cemetery. I also think that folks that live outside of our Shire, should be discouraged from using the reducing valuable plots, unless they were from Pioneering Families. I do feel very strongly on this and would like to think some discussion is held before key decisions are made. Yours Faithfully , Neil Kentish

Please consider for denominational areas for religious/ethnic groups. As the shire population growing, there are more people belongs to religious/ethnic groups and want that loved ones to be buried close by. I am from Muslim community and there are so many other members of muslim community lived in shire area. We dont have nearby cemetery. You are requested to review the plans and provide us some denominational area for our Muslim community either in serpentine or jarahhdale cemetery.

Absolutely disgusting thing to do. Disturbing the dead is outrageous and inhuman!! My father in law passed away only 3 months ago and has not even decomposed yet. Leave the site alone!

To whom it may concern I have just buried my father there three months ago and I have purchased that piece of land for at least 25 years with the belief the rest of my family will be buried with him. I am disgusted to think somebody would even think of this. If I'm reading this correctly you want to remove all the bodies and put them somewhere else. The cemetery was made in 1880 this makes it a Heritage site. It is also the restingplace of the early settlers making it even more important to history. My family and I will be more than disappointed to be honest we will be very very angry if this was to go through. This poor and inhumane decision will be your councils downfall and a very poor reflection of each and everyone of you. As the government seems to do what it likes and don't give a shit for anybody. if this was to happen I demand to be present for the removal of my father and the re-fitment of him and his memorial site at your cost. I will also require compensation and probably counselling . Could you imagine someone you loved been dug up and moved around. These Morial sites go into the tens of thousands of dollars and that will be a very big cost to the community. Do I have to remind use of the disaster created at Karrakatta Cemetery. The families of the many people affected are still grieving and appalled with the decision and outcome of that councils decision. Please reassure me this is not the case as it is what people are all talking about maybe the information is incorrect and you just want to clean the place up a little bit and put some toilet facilities and whatnot there if that is the case that is okay but please do not remove the burial sites.

<p>Screen Name Redacted 4/21/2021 01:24 PM</p>	<p>I would like to see the old unmarked graves on the East side of cemetery over the ditch & on the fence line and the ones on the other side of the fence line be include in the cemetery upgrade. They appear to be discarded and unkept. Also would like to see the Cemetery grounds maintained professionally and regularly. Due to a lot of theft of Ornaments and vandalism I would like to see surveillance cameras installed. It is very upsetting to have your loved ones graves desecrated and disrespected. No objection to the new sites. Thank you</p>
